FITTING OF ARTIFICIAL LIMBS IN A BEAUTIFUL ENVIRONMENT

Marissa Nel and Associates provides prosthetic care and rehabilitation in a beautiful environment. With a focus on individual patient care we ensure that each patient is attended to with the utmost dignity and kindness.

We offer a perfect setting for the fitting of artificial limbs after amputation. Many times, the short stay at Marissa Nel and Associates at Pinehaven Netcare Hospital in the Cradle of Humankind area is the perfect stepping stone to learn to adapt to and use your new artificial limbs.

The Cradle of Humankind World Heritage Site is one of eight in the country. It's the world's richest hominin site, home to around 40% of the world's human ancestor fossils.

The Cradle of Humankind region in South Africa, offers visitors the opportunity to learn about stones and bones, wine and dine in tranquil surroundings, try out a range of adrenalin-pumping activities, discover a range of wonderful wildlife and experience culture and craft.

The area is also home to a diversity of birds, animals and plants, some of which are rare or endangered.

Patients have the freedom to make choices about daily schedules including a variety of accommodation options, when to eat or start their day; whether to join in activities or to enjoy the privacy of their room.

We extend a warm welcome to patients requiring fitting of artificial limb, which is available at affordable prices from a certified Prosthetist.

Artificial limbs and orthotic devices are manufactured in-house and are designed for each patient individually. We offer solutions and products from the largest Orthotic and Prosthetic manufacturers in the world.

The Prosthetists will be taking care of the measuring, manufacturing and fitting of your prosthetic limb ensuring a comfortable fit for you to achieve maximum independence.
